

---

Chimont International offers research and development services, through pre-industrial formulation and application processes, of chemical products and transfer films for the tanning industry; it also markets under its own brand and manufacturer's brands of chemical products and transfer films for the tanning industry. Chimont pays primary attention to the innovation of tanning processes with particular attention to sustainability both in terms of the use of chemicals and in the reduction of environmental impacts (energy consumption, water, pollution, waste, ...).

The purpose of the company is to satisfy the needs of the customer, the tanning entrepreneur, which are in summary:

- reduction of product costs;
- reduction of environmental impact and better sustainability of processes;
- enhancement of the raw material, leather.

Chimont is fully aware that a responsible economic strategy, aimed at the environmental and safety issues deriving from its activities, is essential for its success and for the satisfaction of its customers.

## **QUALITY**

Chimont intends to acquire and maintain an increasingly high competitiveness on the international market, through the full satisfaction of the Customer's expectations, in terms of quality and high level of the products made and the services offered.

## **ENVIROMENT**

Chimont is aware of the duty to preserve and protect the environment. The company is committed to put at work environmental management systems able to control effectively the potential effects of the production phase, to create opportunities of energy conservation, reduction and disposal of waste and to ensure an efficient use of natural resources throughout the entire supply chain and the product life cycle.

## **SAFETY AND HEALTH**

Chimont is aware of the duty to protect the health and safety of all its workers, clients and all the people involved which may be effected by the company activities. The company is committed to adopt procedures and programs able to guarantee the safety of the working area both for its employees and clients by making them aware of the correct use of the products. At all levels of the organization, health and safety management systems are adopted to ensure compliance with the commitments made by the company.

In order to reach these goals, our company aims to promote, develop and support the following activities:

- improvement in research and development of innovative products and process
- the wide and widespread involvement of all staff
- all level training for professional improvement
- promotion and dissemination of the mentality of of continuous improvement
- respect of legal and subscribed rules
- promotion of low environmental impact products, limitation of chemical risk in a higher attention in products' use
- activation of adequate channel of communication internally and externally.
- adoption of a Management System for quality, environment and safety in accordance with internationally recognized regulations

Chimont is a company which works with commitment and a sense of responsibility to improve the sustainability of processes by promoting the culture of innovation, quality, respect for the environment and health and safety throughout the supply chain.
